This is the story

My grandfather, being single and thinking that he wanted to get married, came up with the idea of doing something special to propose to the woman who could be the chosen one of his dreams, so he toured Mexico asking for the best wood craftsmen, he has good luck to find not only the best Mexican artisans, but at that time and due to their arrival to Mexico to get rid of the 1st World War, a group of Italian artisans arrived and, together with the Mexican artisans, asked them to design and manufacture for he; the best dining room and the best bedroom they had ever made in his life; so they took on the task of manufacturing them, they cut them, molded them, carved and engraved them completely made by hand, then they sent all the furniture to Mexico City.

My grandfather met my grandmother when he was almost 30 years old and she was barely 15 years old and he told her father that he had fallen in love with his daughter, he married her and as a bridal offering, he gave her this magnificent dining room and the fabulous bedroom that he had sent. to do for the occasion.

My grandfather passed away when she was 45 years old.

My grandmother bought an apartment on the 2nd. floor in a luxury residential area, and when the person who built the building was watching the move, she saw the dining room and the bedroom and told him that she would give him the apartment on the 10th floor. Totally free an apartment if he agreed to give her the dining room and the bedroom in exchange for her and at no cost to her.

My grandmother said that she didn't want, because it was the only thing, she had of her husband to remember him by.

She never wanted to remarry because she loved him intensely, so she never wanted to sell the set either, despite the fact that she sometimes had offers of great value.

My grandmother passed away a few months ago at the age of almost 105 years.
